

The **Institute for Molecular Infection Biology**
at the **Research Center for Infectious Diseases**,
University of Würzburg, offers

a postdoctoral position (TV-L E13)

for a period of 4 years. The scope of the work to be performed is the development of new chemotherapeutic agents against *Leishmania* parasites and the analysis of the antiparasitic effects of naphthylisochinoline alkaloids and cysteine protease inhibitors in the murine model of leishmaniasis (Ponte-Sucre et al., Antimicrob. Agents Chemother., 50: 2439-2447, 2006; Ponte-Sucre et al., Antimicrob. Agents Chemother., 51:188-94, 2007). The applicants are expected to have a first-class education in cell biology, signal transduction, molecular biology and/or immunology as well as the willingness to work independently in this challenging research field with international competition.

Preference will be given to severely handicapped applicants if equally qualified.

Applications to: Prof. Dr. Heidrun Moll, Institut für Molekulare Infektionsbiologie, Universität Würzburg, Röntgenring 11, 97070 Würzburg. E-mail: heidrun.moll@mail.uni-wuerzburg.de

For further questions: Prof. Dr. Alicia Ponte-Sucre (Tel. 0931/31-2141, E-mail: alicia.ponte-sucre@mail.uni-wuerzburg.de).
