

**Postdoc position at the Center of Infection Biology and Immunity  
(start 15th Feb. 2008; 2 years)**

Lab: Prof. Richard Lucius; Molecular Parasitology, Humboldt-University Berlin  
([www.biologie.hu-berlin.de/molpara](http://www.biologie.hu-berlin.de/molpara))

The successful applicant works on molecular aspects of the interaction between parasitic nematodes or apicomplexan parasites (*Eimeria*, *Toxoplasma*) with the host immune system. She/he is embedded into the Research Training Group Graduiertenkolleg 1121 ([www.idi-berlin.de](http://www.idi-berlin.de)) and is expected to introduce students of the PhD program into aspects of infection biology.

The successful applicant has expertise in parasitology, molecular cell biology, and/or immunology. She/he has a PhD and preferentially has experience as a postdoc, carries out independent research and has an appropriate publication record. The position is suitable for applicants interested to build up a career in the German university system.

Please send your applications until November 30th, 2007 to
